

Respondus LockDown Browser

Loyalist College uses a testing system that requires the program Respondus LockDown Browser. Students must use a desk computer or laptop. Note: Chrome Notebooks and Apple products are **not** compatible with our Blackboard system/Lockdown Respondus Browser. We use MS Word, Excel and PDF formats. You will need an adequate Internet connection. You cannot use a cell phone to complete the exam/test.

WHAT IS RESPONDUS LOCKDOWN BROWSER?

Respondus LockDown Browser is a locked browser for taking a test/exam in Blackboard Learn. It prevents students from printing, copying, going to another URL, or accessing other applications during a test/exam. If a Blackboard test requires that Respondus LockDown Browser be used, students will not be able to take the test/exam with a standard web browser, such as Firefox, explorer and Chrome.

LockDown Browser is only to be used for taking Blackboard tests and exams. It should not be used in other areas of Blackboard such as looking at your lessons or submitting assignments. Lock Down Browser tracks student activity within the test or exam and will identify if there are any connection issues with your internet server. There are safeguards to prevent submission by accident, by asking if you are sure you want to close the test/exam.
